

# CB50100 Dot Peen Marker

## Desktop / Handheld Combination Dot Peen Marking

The CB50100 is a combination style dot peen marking system that can be used as a desktop or handheld unit with a 50mm x 100mm marking window.

This system is ideal for users who have a variety of part sizes to mark. The desktop configuration can be used to mark smaller parts that can be placed under the unit or simply lift the marking head off for handheld mode to take the unit to large or heavy parts that can't be easily moved.

This unit has a pneumatically driven needle and various needle sizes are available for any application.

CB50100 comes with a high-flex long length cable. Custom stand-offs and magnetic holders also available.

This unit can be controlled using our UMC Box, UMC Eco or UMC 112.

### Features of the CB50100:

- ▶ Compact, lightweight design
- ▶ Variety of needle sizes available for any application
- ▶ Quick switch between desktop or handheld
- ▶ 2 year warranty
