

HH50100 Dot Peen Marker

Portable and Flexible Handheld Dot Peen Marking

The HH50100 is a handheld dot peen marking system with a 50mm x 100mm marking window.

Our handheld dot peen marking units are ideal for users who need to mark parts that are simply too large or heavy for a benchtop style unit.

This unit has a pneumatically driven needle and various needle sizes are available for any application.

HH50100 is available in a single or dual handle configuration and comes with a high-flex long length cable. Custom stand-offs and magnetic holders also available.

This unit can be controlled using our UMC Box, UMC Eco or UMC 112.

Features of the HH50100:

- ▶ Compact, lightweight design
- ▶ Variety of needle sizes available for any application
- ▶ 2 year warranty
