

WK20 Laser Marking Workstation

Stand-alone, Lightweight, Flexible Safety Enclosure

The WK20 is a fully enclosed Class 1 safety laser marking workstation.

This system can house a variety of our laser markers including our entire line of Lasonall™ laser markers. All laser components, control and PC are housed in the protective enclosure.

It's lightweight design and locking castors allow users to be flexible in the integration of this workstation into their current production process. The small footprint is ideal for integration into a work cell or line on the production floor, or users can simply choose to be mobile with the system.

Many accessories are available for the WK20 system including fixtures, rotary devices, fume extraction units and more.

Features of the WK20:

- ▶ Lightweight, flexible enclosure with locking castors
- ▶ Class 1 safety certified with interlocks, labels, pendant w/key start and safety viewing window
- ▶ Front sliding part loading door and four (4) service access doors.
- ▶ One-plug 115VAC operation
- ▶ T-slot worksurface, adjustable swing arm for monitor, keyboard and mouse
- ▶ Fixed, manual, power or fully programmable automatic z-axis focal height adjustment
