

The EU Expert provides the highest industry standards in electrolytic etching controls. Digital design, 4-line LCD display, foil keyboard, repeatable settings, and marking parameters are all included in this model. Our modular design provides for easy integration into our semi- and fully-automatic marking stations. The EU Expert provides for automatic controls and data storage is provided for easy recall of marking parameters. An optional serial interface is available for extended communications capability.

Features

- Non-corrosive electrolytes
- Non-smearing permanent marking
- Digital controls and display
- No part deformation

Specifications

Input Voltage	115 or 230 V AC
Output Voltage	0 - 24 V (AC/DC)
Max Power	310 VA to 510 VA
Dimensions	140 x 380 x 220 mm
