

The Flowetch Compact 300 marking system is a semi-automatic compact unit which marks from the bottom. Marking from below provides improved stencil life as the stencil is constantly rinsed by electrolyte which prevents overheating. Large and small markings also benefit from this process with improved quality. Each unit is comprised of the marking control unit (EU Classic 300), a pneumatic system, electrolyte recycling basin, and a securing fixture for the stencil and product to be marked. The Flowetch Compact 300 system is especially suitable for marking any chrome-plated or nickel-plated products.

Advantages

- Non-corrosive electrolytes
- Non-smearing permanent marking
- Digital controls and display
- No part deformation

Special Accessories

- Double marking (above and below)
- Special marking heads
- Rotary switch table
- Time lapse
- Counter

Specifications

Input Voltage	115 or 230 V AC
Output Voltage	0 - 24 V (AC/DC)
Max Power	310 VA
Air Pressure	4 bar
Dimensions	410 x 308 x 690 mm
