

The Modulmat 500 marking system is completely self contained and ready for semi-automatic operation. This compact unit contains the marking controls (EU Classic 500), a pneumatic top marking head assembly, electrolyte pumping system, and securing fixtures for stencils and products to be marked. The Modulmat 500 is suitable for marking products with metallic, electrically conductive surfaces. A dosing feed system ensures that the electrolyte cannot escape outside the marking area.

Advantages

- Non-corrosive electrolytes
- Non-smearing permanent marking
- Digital controls and display
- No part deformation

Special Accessories

- Rotary device for 360° marking
- Double marking (above and below)
- Special marking heads
- Rotary switch table
- Time lapse
- Counter

Specifications

Input Voltage	115 or 230 V AC
Output Voltage	0 - 24 V (AC/DC)
Max Power	510 VA
Air Pressure	4 bar
Dimensions	410 x 308 x 690 mm
