

Chemical Etching Stencils

On-Demand Electrolytic Etching Stencils

Our electrolytic etching stencil printing system is quick and easy.

Using a Brother P-Touch™ printer, our chemical etching stencil cartridge allows users to quickly print a variety of single or multi-line text. After printing, the stencil is automatically cut to size. Just peel away the backing and place the stencil on your part to begin marking. Each stencil is good for approximately 2-3 marks.

Connect the printer to a computer via USB to print graphics and logos.

The cartridges are TZ size and will fit in any Brother printer using a TZ size cartridge and come in two sizes.

Features:

- 18 or 24mm x 3m Sizes
- Each Stencil is Ideal for 1 to 3 markings
- Create Text and Graphics

Powerful. Simple. Affordable.
