

FUME EXTRACTION

Remove harmful dust and fumes from your laser marking system.

A Fumex fume extraction system can be paired with any of our laser marking products to help remove harmful dust or fumes created by the laser marking process.

Fume extraction is not only important for operator health and safety, but also helps to keep your laser system clean and free of excess dust.

Customers marking plastics, creating deep engravings or marking anodized or plastic materials can benefit from the use of fume extraction.

Our standard laser systems are pre-ported for easy hookup to the fume extraction unit.

A four stage replaceable filter system is included.

System Features

- Two Large Capacity Pre-Filters
- Large Capacity HEPA Filter
- High Efficiency Gas/Odor Filters Featuring “Dustless” Bonded Carbon Technology.
- Variable Speed Blower Control
- Filter Monitoring with Display
- Calibrated Electronic VOC/Gas Sensor

Powerful. Robust. Reliable.
