

Rent or Lease

laser marking systems

Did you know TYKMA also offers laser system rentals?

We strive to offer the most flexible purchase options available in the laser industry; all designed to make your decision easy!

Have a short term laser marking project? Want to take a “test drive”? Rent you choice of Minilase™ or Zetalase™ models by the month. If you decide to buy at any time, your first month’s payment and security deposit will be applied to the purchase.

Leasing options are available through our Preferred Partners.

If you are looking at a more flexible way to finance your laser system purchase, ask us about leasing with our preferred partners.

*Rental applies to the above base models only per approved credit. Minilase™ Keon not available for rental. Six month minimum rental required for Zetalase™. Refundable security deposit of one month’s rent required at time of rental. Rental payments due in advance each month. Upon rental to purchase conversion, only the first month’s payment and security deposit will be credited toward the purchase price, regardless of total rental time. Please consult your TYKMA sales representative for full details.

Powerful. Simple. Affordable.
